

# HLR 950-1 1 1/2" Vent Cap

The HLR Vent Caps are pressure relieving devices designed to prevent accumulation of pressure within a hydraulic reservoir. The Vent Cap will allow gas to escape a reservoir before pressure accumulation can occur.

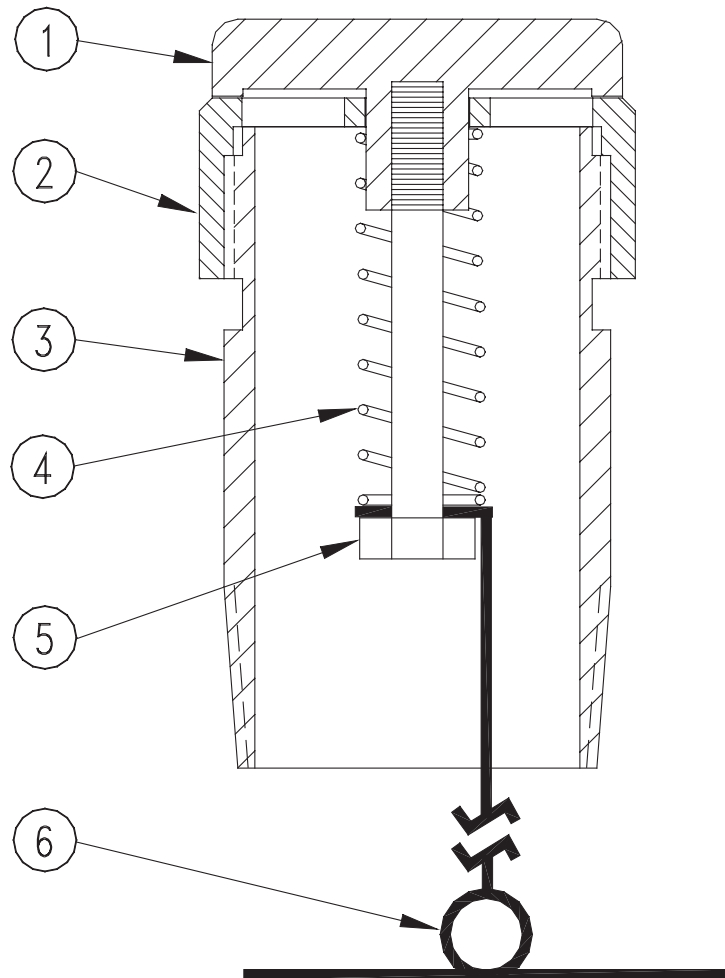

Under normal operating conditions, the HLR 950 Series Vent Caps will prevent rain, dust and other atmospheric contaminants from entering the hydraulic tank or reservoir. A spring holds the Cap closed and allows pressure to escape.

**Design Features:**

Dimensions - 3.625" L. X 2.100 OD

Weight - 1.25 LBS

Connection - 1-1/2" NPT

## BILL OF MATERIAL

ITEM	DESCRIPTION	MATERIAL
1.	Cap	316SS
2.	Cover	316SS
3.	Pipe Nipple	316SS
4.	Spring	302SS
5.	Bolt	302SS
6.	Tether	316SS
